

I live in Fort Wayne, and I am on the Do Not Call list. I do not have a land line, just a cell phone. But because I list it as my primary number when filling out forms, etc. I used to get a ton of sales calls on it, disrupting my day, and wasting my minutes. If these companies succeed in getting rid of the Do Not Call list, they will be taking away our right to privacy! Most of them already block their ID, so we don't know who is calling us. Most people pick up calls with no ID, in case it's important. Do not let them get away with invading our privacy, please.
